Forum - Iris Knowledge Platform

Description

A community is often better than an individual at solving issues. Sharing and discussing ideas is the cornerstone for innovation. If you have a question about conservation, through the IRIS platform you can interact with conservationists and art enthusiasts from around the world. This could not only benefit you but the entire community as well. This is a repository of information.

Motivation

Currently there is a dearth in communities catering specifically to art conservation. The most popular option is a reddit subthread /r/ArtConservation. Building this platform for conservationists could bring in diverse perceptions to a problem thus helping in growing the community.

Technical details

Platform - Web
Languages - Ruby on Rails
Frameworks - Discourse
We are using the discourse platform to create this forum.
